

Christos Galanopoulos

DevOps Engineer

Experienced engineer and Microsoft MVP specializing in designing scalable, secure, and efficient solutions for complex infrastructures and large enterprises. Adept at translating business and customer requirements into high-quality architectures. Proficient in Solution Architecture, Process Design, DevSecOps, Cloud Operations, CI/CD Optimization, and Infrastructure as Code. I combine deep technical expertise with strong customer engagement to drive successful project outcomes from design through deployment.

WORK EXPERIENCE

DevOps Engineer

PERFORMANCE Technologies S.A.

10/2021 - Present

Athens, Greece

Achievements/Tasks

- Designed and implemented a robust code governance framework for infrastructure management, enhancing deployment frequency, lead time for changes, and reducing change failure rates.
- Led the design and architecture of complex infrastructure solutions, aligning with business objectives and scalability requirements. Collaborated with stakeholders to translate requirements into actionable technical specifications.
- Developed and maintained CI/CD pipelines to streamline processes, improve code quality, enhance security, and ensure industry compliance.
- Applied DevSecOps practices to integrate security measures proactively, following a "shift left" approach.
- Designed and delivered multiple PoCs, refining solutions based on customer feedback to meet functional and performance criteria.
- Conducted technical presentations and product demonstrations, simplifying complex concepts for non-technical stakeholders to ensure clear communication and alignment.

PERSONAL PROJECTS

bicep-docs

- A command-line tool that generates documentation for Bicep templates.

terraform-template-repo

- An opinionated template repository designed to streamline Terraform projects.

EDUCATION

Department of Informatics and Telecommunications

National Kapodistrian University of Athens

09/2019 - 07/2023
